

“An excellent course. Great insight into the needs ... of the pedestrian.”

- Idaho DOT participant

“Field exercise was an eye opening experience. Excellent use of slides and videos.”

- Houston-Galveston Area Council participant

Designing Pedestrian Facilities for Accessibility

• **Newly updated!**

• **Increase your understanding of Public Right-of-Way Accessibility Guidelines (PROWAG) and FHWA ADA policies**

• **Take home useful resource documents**

Subjects Covered

Legal Policies • Sidewalk Design • Crossings • Intersections • Curb Ramps Construction • Pedestrian Signals • Maintenance • Temporary Traffic Control

Team Instruction

- Trained APBP instructor
- US Access Board instructor*
- Local ADA expert (if available)

**Optional for additional fee*

Field Exercises

- Walking audits
- Wheelchairs – experience slopes, cross-slopes, and ramps
- Vision degraders – decision making about street crossing

Classroom Interaction

- Discuss best practices for new design and retrofits
- Group problem-solving exercise
- Compare local design standards
